U.S. AND CANADIAN FOUNDRY SHIPMENTS OF ALUMINUM CASTINGS

Report for 2009

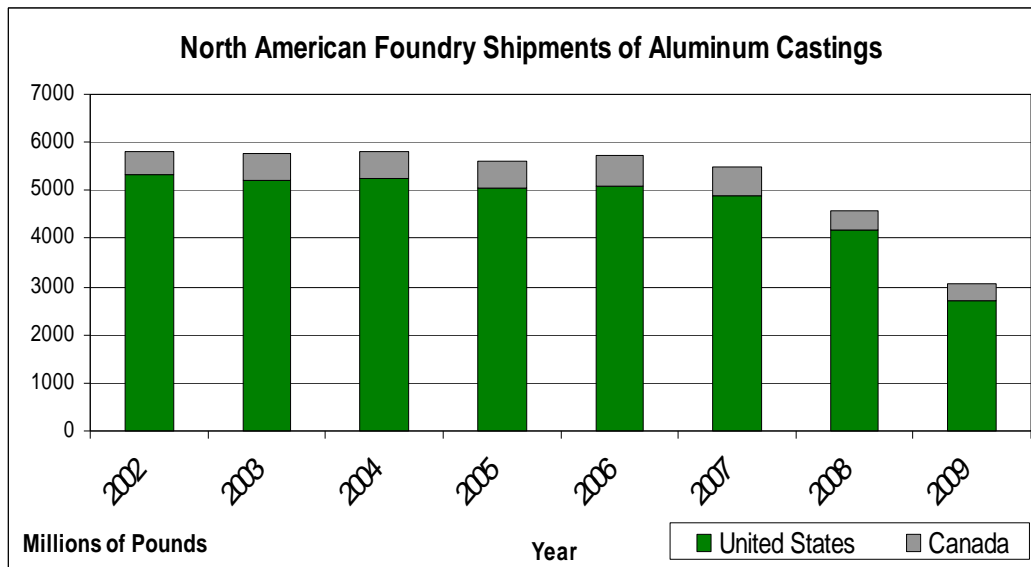

Issued: April 23, 2010

Based on survey responses from 267 foundries in the United States and 48 foundries in Canada, estimated North American (excluding Mexico) shipments of aluminum castings totaled 3,043.6 million pounds during 2009, a drop of 33.4 percent from the 2008 estimated total of 4,569.1 million pounds.

The figures in this report are full industry estimates based on surveys received from participating foundries. The 267 participating U.S. foundries account for 42.1% of the estimated U.S. total, and the 48 participating Canadian foundries account for 30.0% of the estimated Canadian total.

Note: Figures in this report may not add to totals shown due to rounding.

This report is prepared by The Aluminum Association based on the results of surveys conducted by an independent research firm. The research firm surveys a panel of foundries and expands the survey results to an estimated industry total. While the Association believes that its statistical procedures and methods are reliable, it does not warrant the accuracy or completeness of the data. All data contained herein are subject to revision. © The Aluminum Association, Inc.

U.S. FOUNDRY SHIPMENTS OF ALUMINUM CASTINGS BY INDUSTRY

Based on survey responses from 267 foundries in the U.S., shipments of aluminum wheels by U.S. foundries totaled an estimated 527.6 million pounds during 2009, off 13.5 percent from the 2008 total of 609.7 million pounds, while shipments to all other automotive¹ applications totaled 1,155.5 million pounds, a drop of 41.9 percent from the 2008 total of 1,989.1 million pounds. Shipments to all other industries² totaled 1,036.7 million pounds, a decrease of 34.4 percent from the 2008 total of 1,579.5 million pounds.

U.S. FOUNDRY SHIPMENTS OF ALUMINUM CASTINGS BY METHOD

Shipments of die castings by U.S. foundries totaled an estimated 1,523.0 million pounds during 2009, down 32.7 percent from 2008 total of 2,264.6 million pounds. Shipments of permanent mold castings totaled 832.2 million pounds, a decrease of 33.7 percent from the 2008 total of 1,255.8 million pounds, and shipments of sand castings totaled 352.4 million pounds, off 37.2 percent from 2008 total of 561.1 million pounds.

U.S. FOUNDRY SHIPMENTS OF ALUMINUM CASTINGS BY SOURCE METAL

Participating U.S. foundries indicated secondary ingot as 1,788.4 million pounds of their source metal during 2009, or 61.5 percent of total source metal, and primary ingot as 1,120.4 million pounds, or 38.5 percent of total source metal. This compares to the 2008 results of secondary ingot reported as 64.2 percent of source metal and primary ingot as 35.8 percent of source metal. Over the ten-year period of 2000 to 2009, secondary ingot averaged 64.1 percent of source metal and primary ingot averaged 35.9 percent of source metal.

CANADIAN FOUNDRY SHIPMENTS OF ALUMINUM CASTINGS BY INDUSTRY

Based on survey responses from 48 foundries in Canada, foundry shipments to passenger cars & light trucks, including wheels, totaled an estimated 295.6 million pounds during 2009, off 18.7 percent from the 2008 total of 363.8 million pounds. Shipments to truck & bus and shipments to all other transportation markets totaled 5.7 and 6.6 million pounds, respectively, during 2009. Shipments to consumer durables, machinery and equipment, and all other industries totaled 15.9 million pounds.
