

STANDARDS ACTION REPORT

February, 2017

RECENT STANDARDS ACTIONS

The Aluminum Association completed registration of one new international wrought alloy designated 2071. In addition, the Association completed tentative temper registration of 2196-T8511 Extrusion products.

Note: The chemical composition limits of the registered alloys since the last edition of the Teal Sheets are listed in the addenda of this publication, available at <http://www.aluminum.org/resources/industry-standards>.

NEW PROJECT ANNOUNCEMENT

Following is a list of new projects initiated since the last report, currently under review by The Aluminum Association's Technical Committee on Product Standards. All parties that could be affected are welcome to comment on individual proposals:

Miscellaneous

Project No. Subject

PN17-50 Changes to eligibility requirement number four on Pink Sheet Registration Request Form

STANDARDS MEETINGS

Subcommittee on Alloy and Temper Registrations	April 5, 2017
Technical Committee on Product Standards	April 5-6, 2017

The majority of the Association's standards activities are carried out by the Technical Committee on Product Standards (TCPS) in accordance with The Aluminum Association procedures governing these activities. Product Divisions may also form technical committees to work on specific standards that affect their products. For example, the Electrical Division has a Task Group of AA Representatives on National Electrical Code Panels.

To request a copy of a project or to discuss placing a representative on TCPS, contact John Weritz at standards@aluminum.org
