- Note: 1) Includes extruded sheet, pipe and tube (excluding drawn and round) (extruded or rolled).
 2) Participating companies account for approximately 41% of the total industry.
 3) Where possible, participating companies have identified end use shipments for their shipments to distributors; total shipments to distributors are total shipments without identified markets.
 4) Export figures exclude shipments to Mexico and Canada.
 5) Shipments by market exclude distributor shipments to shared markets. Statistics may not be comparable to previous periods.
 6) Producer net shipments – exclude imports. Estimated 100% of total industry.

This report is based on information provided by participating companies which is aggregated by the Aluminum Association. It is not intended to be representative of the total industry. While the association believes that its statistical procedures and methods are reliable, it does not warrant the accuracy and completeness of the data. Producers' Shipments of Extruded Products by Major Market

Product Definitions:

Extruded Shapes - A product produced by extruding, that is long in relation to its cross-sectional dimensions and has a cross section other than that of rod and bar and pipe and tube.

Pipe And Tube (extruded or drawn) - A hollow product, usually formed by extruding, that is long in relation to its cross section, which is round, square, rectangular, hexagonal, octagonal, or elliptical in shape.

Rod And Bar (extruded or drawn) - A solid product, usually produced by extruding (sometimes brought to final dimensions by drawing), that is long in relation to cross section, which is round, square, rectangular, hexagonal, or octagonal in shape and 0.375" or greater in diameter or in at least one perpendicular distance between parallel faces.

For information on products/applications included in end use categories, see the End Use Guide.

Note: This report is based on information provided by participating companies which is aggregated by the Aluminum Association. It is not intended to be representative of the total industry.

[The Aluminum Association](#), based in Arlington, Virginia, represents U.S. and foreign-based primary producers of aluminum, as well as recyclers, and producers of semi-fabricated products, and suppliers. Member companies operate over 200 plants in North America and many conduct business worldwide.

Statistical Reports and Publications

The Aluminum Association's statistical programs provide industry information on primary aluminum production, new orders of mill products, industry shipments, end use market estimates, inventories, recycling and foreign trade on a monthly, quarterly and annual basis. Special surveys provide data on specific subjects such as primary capacity, flat roll capacity, safety, inventories and castings shipments. The Association's foreign trade reports are based on government customs data.
